VR for autism therapy  
Class project, Spring 2017

## SKILLS

Illustrator

Photoshop

Lightroom

Unity

XCode

Android Studio

Javascript  
C#  
C++  
HTML  
CSS  
Java

## PASSIONS

I volunteer for Senior Connections, through which I meet an 83 year old senior citizen for an hour every week. Doing this brings me a lot of joy.

I love photography because it helps me connect to new places. I was the global winner of the University of Melbourne Photo Competition in 2015, through which I won a fully funded trip to Melbourne.

I love theatre, music and art. Throughout high school I studied theatre and acted in several plays. I also played the guitar and love singing songs by Bob Dylan. At college, I hope to take more art classes and actualize my passion for creativity.
